

PRIVATE EQUITY INTERNSHIP AT CIM CAPITAL

CIM Capital is an investment company focused on companies that run into difficulties and where financial, but usually also operational reinforcement is needed. CIM Capital has a very hands-on approach and already led several successful restructurings in Belgium.

In 2020 CIM Capital founded the CIM Capital Restruct Fund, a private equity fund investing in companies facing a restructuring or transformation. The fund raised €65 million with institutional and private investors. Currently the fund has a stake in Veritas and recently acquired the Neckermann Belgium travel shops.

CIM Capital's activities are rapidly growing and we are constantly looking at interesting situations for the fund, which gives ample room for a dynamic young profile to perform an internship in our offices in Antwerp.

Do you like to get a real life experience in private equity, in one of the most dynamic and hands-on strategies in PE?

Your responsibilities:

- Business and financial modelling
- Screening potential industries and companies
